The Ancient Art of Transformation-Renee M. Gondek 2018-12-06 The Ancient Art of Transformation: Case Studies from Mediterranean Contexts examines instances of human transformation in the ancient and early Christian Mediterranean world by exploring the ways in which art impacts, aids, or provides evidence for physical, spiritual, personal, and social transitions. Building on Arnold van Gennep's notion of universal rites of passage, papers in this volume expand the definition of "transformation" to include widespread transitions such as shifts in political establishments and changes in cultural identity. In considering these broadly defined "passages," authors have observed particular changes in the visual record, whether they be manifest, enigmatic, or symbolic. While several papers address transitions that are incomplete, resulting in intermediary, hybrid states, others suggest that the medium itself can be integral to interpreting a transition, and in some cases, be itself transformed. Together, the volume covers not only a broad chronological span (c. 5th century BC to 4th century AD), but also an expansive geographical range (Egypt, Greece, and Italy). Reflecting upon issues central to a variety of Mediterranean cultures (Egyptians, Etruscans, Greeks, Romans, and early Christians), The Ancient Art of Transformation documents how personal, societal, and historical changes become permanently fixed in the material record. The Ancient Art of Transformation examines the visual manifestation of human transformation in the ancient and early medieval Mediterranean world, exploring the role of art and visual culture in enabling, hindering, or documenting physical, spiritual, personal, and social transitions such as pregnancy and birth, initiations, marriage, death and funerals. The definition of "transformation" is also expanded to address instances of less personal and more widespread transitions such as shifts in political establishments and changes in cultural identity in geographic locations. Additionally, although the ancient material record documents certain rites of passage such as marriage and death extensively, artifacts and their accompanying images are often studied simply to reconstruct these social processes. Authors here suggest that material evidence itself can be integral to interpreting a transition, and in some cases, be itself transformed. Further, several papers address transitions that are incomplete, resulting in intermediary, hybrid states that are very often reflected in the visual record such as Athenian vase-painting imagery forecasting the bride as a mother, displays of nudity that reflect intermediate life stages in Etruscan art and Octavian's visual transformation into Pharaoh and Augustus in Egyptian architecture and material culture. At its core the volume establishes current methods for understanding how ancient visual culture shaped, informed, and was affected by processes of transformation. Together, these papers offer a close examination of various types of visual evidence from several cultures and periods (e.g., Etruscan, Greek, Roman, early Christian), and document how personal, societal, and historical changes become permanently fixed in the material record.
Colour and Light in Ancient and Medieval Art-Chloë N. Duckworth 2017-12-15 The myriad ways in which colour and light have been adapted and applied in the art, architecture, and material culture of past societies is the focus of this interdisciplinary volume. Light and colour's iconographic, economic, and socio-cultural implications are considered by established and emerging scholars including art historians, archaeologists, and
conservators, who address the variety of human experience of these sensory phenomena. In today’s world it is the norm for humans to be surrounded by strong, artificial colours, and even to see colour as perhaps an inessential or surface property of the objects around us. Similarly, electric lighting has provided the power and ability to illuminate and manipulate environments in increasingly unprecedented ways. In the context of such a saturated experience, it becomes difficult to identify what is universal, and what is culturally specific about the human experience of light and colour. Failing to do so, however, hinders the capacity to approach how they were experienced by people of centuries past. By means of case studies spanning a broad historical and geographical context and covering such diverse themes as architecture, cave art, the invention of metallurgy, and medieval manuscript illumination, the contributors to this volume provide an up-to-date discussion of these themes from a uniquely interdisciplinary perspective. The papers range in scope from the meaning of colour in European prehistoric art to the technical art of the glazed tiles of the Shah mosque in Isfahan. Their aim is to explore a multifarious range of evidence and to evaluate and illuminate what is a truly enigmatic topic in the history of art and visual culture.

History of Art-Élie Faure 1921

Ancient Art and Its Historiography-Alice A. Donohue 2003 This 2003 book treats the historiography of ancient Near Eastern and Classical art, examining the social, intellectual and institutional contexts that have shaped the way that the history of ancient art has been and continues to be written. It demonstrates how, from the Renaissance to the time of publication, the study and interpretation of ancient art reflect contemporary ideas and practices. Among the subjects considered are the classical tradition in the post-antique West; the emergence of academic disciplines; the role of collections in the evaluation of ancient art; and issues of race, gender, and cultural authority in the interpretation of ancient civilisations. Winckelmann's interpretation of the history of ancient art in its eighteenth century context-Alexander Potts 1978
The Invention of Art History in Ancient Greece-Jeremy Tanner 2006-03-23 The ancient Greeks developed their own very specific ethos of art appreciation, advocating a rational involvement with art. This book explores why the ancient Greeks started to write art history and how the writing of art history transformed the social functions of art in the Greek world. It looks at the invention of the genre of portraiture and the social uses to which portraits were put in the city state. Later chapters explore how artists sought to enhance their status by writing theoretical treatises and producing works of art intended for purely aesthetic contemplation, which ultimately gave rise to the writing of art history and to the development of art collecting. The study, which is illustrated throughout and draws on contemporary perspectives in the sociology of art, will prompt the student of classical art to rethink fundamental assumptions about Greek art and its cultural and social implications.

The Art of Ancient Music-David Walter Leinweber 2020-10-28 From the very beginning, music has helped us create our world – everything from language, to technology, to philosophy and religion. The Art of Ancient Music discusses the important role music has played in shaping human development. While emphasizing shared human themes, the text has a special focus on the rise of Western music in the ancient Near East, the Bible, and the Classical worlds. A final chapter provides a discussion of the way music helped bridge the gap between the ancient world and the Middle Ages, especially in the guise of Church music.

Material World-Guy Hedreen 2021-05-31 Scholars from ancient and early modern studies, art history, literary criticism, philosophy, and the history of science explore the interplay between nature, science, and art in influential ancient texts and their reception in the Renaissance.

The Ancient Art of Emulation-Elaine K. Gazda 2002 Are copies of Greek and Roman masterpieces as important as the originals they imitate?

Roman Art-Nancy H. Ramage 1995 “This book covers the 1300 years from the Villanovan and Etruscan forerunners of the Romans to the introduction of Christianity under the Emperor Constantine the Great. The text examines the Roman artistic output chronologically, showing how greatly it was influenced by the taste and patronage of the various emperors. Each chapter focuses on one historical period or dynasty, and explores the history, myth and literature behind the art.”--BOOK COVER.

Ancient Art and Cultures-Rosen Publishing Group 2010-01-01 Multidisciplinary sets are a terrific way to engage reluctant readers and to entice students into approaching school subjects with enthusiasm. This set uses major works of art, architecture, and artifacts to reveal the history of ancient civilizations—both high and low, royal and commoner. Surpassing typical dry recitation of facts, figures, and dates, each book offers expert and updated historical information couched within an exciting visual narrative of each civilizations' culture, clothing, religion, food, politics, government, celebrations, and daily life. While excellent resources for reports and study projects within History, Social Studies, and Art, your readers will also covet these books for recreational reading.

A Companion to Ancient Near Eastern Art-Ann C. Gunter 2018-11-20 Provides a broad view of the history and current state of scholarship on the art of the ancient Near East This book covers the aesthetic traditions of Mesopotamia, Iran, Anatolia, and the Levant, from Neolithic times to the end of the Achaemenid Persian Empire around 330 BCE. It describes and examines the field from a variety of critical perspectives: across approaches and interpretive frameworks, key explanatory concepts, materials and selected media and formats, and zones of interaction. This important work also addresses both traditional and emerging categories of material, intellectual perspectives, and research priorities. The book covers geography and chronology, context and setting, medium and scale, while acknowledging the diversity of regional and cultural traditions and the uneven survival of evidence. Part One of the book considers the methodologies and approaches that the field has drawn on and refined. Part Two addresses terms and concepts critical to understanding the subjects and formal characteristics of the Near Eastern material record, including the intellectual frameworks within which monuments have been approached and interpreted. Part Three surveys the field's most distinctive and characteristic genres, with special reference to Mesopotamian art and architecture. Part Four considers involvement with artistic traditions across a broader reach, examining connections with Egypt, the Aegean, and the Mediterranean. And finally, Part Five addresses intersections with the closely allied discipline of archaeology and the institutional stewardship of cultural heritage in the modern Middle East. Told from multiple perspectives, A Companion to Ancient Near Eastern Art is an enlightening, must-have book for advanced undergraduate and graduate students of ancient Near East art and Near East history as well as those interested in history and art history.

Winckelmann’s Images from the Ancient World-Johann Joachim Winckelmann 2013-03-05 Assembled by the father of modern art history, this
landmark 1767 publication features more than 200 fine engravings. Its fascinating panorama of images from classical civilizations includes
informative text and captions.
Egypt as a young artist in 1898, archaeology was beginning to uncover some of the fabled treasures of an ancient land. For the next half-century, he
devoted himself to the great "finds" as they were excavated from the encroaching sands, depicting them in countless paintings for the leading
museums of the world. He became the friend of Flinder Petrie, the greatest of late nineteenth and early twentieth century Egyptologists, and the co-
worker of the best-known archaeologists down to 1950; he explored and painted at Petra, Persepolis, Ur Palmyra, and Baalbek; he also did work with
Sylvanus Griswold Morley in the ancient Maya centers of America, and painted in the Far East. His personal account of what transpired under his
eyes and of the chronology and relations of ancient art over a wide area is at once exciting narrative and important history. The many illustrations
chosen from his painting provide visual accompaniment to his story of classical civilizations and reveal the literal quality of his own art, which has in
notable instances preserved for us the likeness of things that have since crumbled or faded on exposure to light and air after being buried for
centuries. Tombs, Temples, And Ancient Art gains strength for its informality, for while the initiated will discover facts and interpretations of high
importance to science, all readers will recognize in it the work of a man alive to adventure.
Sexuality in Ancient Art-Nathalie Boymel Kampen 1996-01-26 Sexuality in Ancient Art is the first anthology on the visual representation of the sexual
body, sexual activity and desire, and the role of sexuality in the formation of personality and social institutions. Bringing together essays by historians
of the art of Egypt and the Ancient Near East, Greece, the Etruscans, and Rome, this collection demonstrates how a variety of methods and
theoretical frames can be used to define and articulate these issues. The goal of this volume is to open a range of new subjects and approaches in the
visual arts and the problems of representation to students and scholars of the ancient world.
