Political Behavior Of Adolescents In China: The Cultural Revolution In Kwangchow

Political Behavior of Adolescents in China—David M. Raddock 1977
Origins of the Political Behavior of Chinese Adolescents—David M. Raddock 1974

Understanding Political Involvement Among Disadvantaged Adolescents—Suzanne Pritzker 2009 Following substantial concern in recent years about youth disengagement from the political arena, 2008 Presidential election data indicate that youth political participation is now on the rise. However, low-income and some ethnic minority youth are substantially less likely to participate and to hold positive attitudes about politics and government than their wealthier and/or White counterparts. This suggests a possible disconnect between ethnic minority or economically disadvantaged youth and the larger U.S. society, and may signal potential lifelong disassociation from civic processes. Using four years of 12th grade data from Monitoring the Future: A Continuing Study of American Youth, this dissertation sought to assess differential impacts of economic status and racial/ethnic identification on adolescent political development, to inform civic interventions that seek to counter this possible disconnect. Bivariate analyses tested previous findings of racial and socio-economic differences in political attitudes and behaviors. Confirmatory factor analyses assessed whether adolescents of different socio-economic status or races/ethnicities similarly interpret political attitude and behavioral measures. Finally, structural equation modeling analyses tested whether socio-economic status or race/ethnicity moderate paths between political attitudes and behaviors. Results indicated that low-income, Black, and Hispanic adolescents held more negative political attitudes and lower levels of political behavior. While adolescents of different socio-economic status interpreted attitudinal and behavioral items and constructs similarly, important differences were identified across racial/ethnic groups. Specifically, Black adolescents interpreted political attitudes differently than other adolescents, suggesting caution in interpreting cross-group analyses. Finally, path analyses indicated that White adolescents and adolescents across socio-economic status who are interested in government and hold political preferences and beliefs were more likely to engage in non-traditional political activities, while these attitudes did not predict electoral behavior. For these subgroups, positive views of how government acts predict electoral activity, while negative views of how government behaves predict non-traditional political activity. These paths were not all significant for Black, Hispanic, and Asian adolescents, however, suggesting that adolescent paths between political attitudes and behaviors may operate differently across races/ethnicities. Implications of these findings for youth development practice, future research, and civic education and civic development policy are presented.

Political Behavior of Adolescents in China—David M. Raddock 1977

Oxford Handbook of Political Behavior—Hans-Dieter Klingemann 2007 Assembles the world’s leading scholars on public opinion and political behaviour to describe the state-of-the-art research on the beliefs, values and behaviours of contemporary politics.

Political Behavior of Adolescents in China—David M. Raddock 1977

Handbook of Research on Civic Engagement in Youth—Lonnie R. Sherrod 2010-07-30 Engaging youth in civic life has become a central concern to a broad array of researchers in a variety of academic fields as well as policymakers and practitioners globally. This book is both international and multidisciplinary, consisting of three sections that respectively cover conceptual issues, methodological and measurement issues. Broad in its coverage of topics, this book supports scholars, philanthropists, business leaders, government officials, teachers, parents, and community practitioners in their drive to engage more young people in community and civic actions.

Demographic Gaps in American Political Behavior—Patrick Fisher 2018-04-20 Demographic Gaps in American Political Behavior examines the political behavior of various groups in the United States in an effort to demonstrate how demographic backgrounds and socialization affect political behavior. Media coverage has disproportionately focused on the red state versus blue state divide, leaving the impression that American political behavior is determined solely by place of residence. This, however, ignores the numerous other political divides that exist in the United States today. In order to better conceptualize the landscape of American political behavior, Patrick Fisher analyzes the political gaps in six different demographics (income, religion, gender, race, age, and geography) and examines the effect these political gaps have on public opinion, policy, and party positioning. Written in an accessible fashion, Demographic Gaps in American Political Behavior uses contemporary examples and data from the 2008 and 2012 elections to help readers understand how and
why demographic background has the potential to greatly influence political opinions and behavior.

Research Bulletin-1964

Personality and the Foundations of Political Behavior-Jeffery J. Mondak 2010-06-07 "When virtually all of his colleagues were still treating individual-level political traits as isolated phenomena, Jeffery Mondak realized they were in fact intimately connected to larger force such as broad personality traits. This original and remarkably creative book makes it clear that the future of research on personality and politics lies not in shallow, speculative Freudian case studies but in objective, rigorous, large-N analyses. Research at the nexus of personality and politics is starting to gain momentum, thanks largely to Mondak's leadership, and if this book does not significantly enhance that momentum by providing a number of promising new data-based studies, I will be both surprised and bitterly disappointed."—John R. Hibbing, University of Nebraska-Lincoln "Mondak argues persuasively that traits shape political behavior. He provides an accurate and balanced account of recent progress in personality research and illustrates its application in his own work. This book - which should be read by sociologists, historians, and journalists as well as political scientists, historians, and politicians in the integration of the social sciences."—Robert McCrae, author of Personality in Adulthood: A Five-Factor Theory Perspective

The Science of Adolescent Risk-Taking-National Research Council 2011-02-25 Adolescence is a time when youth make decisions, both good and bad, that have consequences for the rest of their lives. Some of these decisions put them at risk of lifelong health problems, injury, or death. The Institute of Medicine held three public workshops between 2008 and 2009 to provide a venue for researchers, health care providers, and community leaders to discuss strategies to improve adolescent health.

Civic Education and Youth Political Participation-2009-01-01 Why does it appear that many young people are disengaged from democracy and political participation? For many governments, politicians, academics, social commentators, and researchers this is a serious and challenging problem. Consequently widespread interest exists on how to engage young people in democracies and democracy.

Framing Civic Engagement, Political Participation and Active Citizenship in Europe-Cristiano Bee 2017-12-22 This book evaluates the role that civic engagement, political participation and active citizenship can play in promoting the establishment of a European polity. The chapters included here examine how the practice of active citizenship is managed and constructed in the context of a European drive to increase civic engagement and political participation in three member states (Portugal, Italy and the UK) and one accession country (Turkey). Looking at both processes and policies promoting active citizenship at the European and national levels, this book uncovers current discourses as well as political priorities and values that surround the activities of non-governmental organizations (NGOs). Of particular interest are debates about the nature and level of civic and political participation and engagement of marginal groups (women, youths, migrants and minorities) as they are particularly vulnerable to social exclusion. The book focuses on the interaction between institutions and civil society actors, addressing a number of questions related to their reciprocal role in influencing, shaping, criticising or disregarding certain political priorities. This book was published as a special issue of the Journal of Civil Society.

(Mis)Understanding Political Participation-Jeffrey Wimmer 2012-12-06 The practices of participation and engagement are characterised by complexities and contradictions. All celebratory examples of uses of social media, e.g. in the Arab spring, the Occupy movement or in recent LGBTQ protests, are deeply rooted in human practices. Because of this connection, every case of mediated participation should be perceived as highly contextual and cannot be attributed to one (social) specific media logic, necessitating detailed empirical studies to investigate the different contexts of political and civic engagement. In this volume, the theoretical chaptering of current contexts and practices for mediated participation. The empirical studies explore the implications of the new digital conditions for the ways in which digitally mediated social interactions, practices and environments shape everyday participation, engagement or protest and their subjectivity as well societal meaning.

Extremism and the Psychology of Uncertainty-Michael A. Hogg 2011-12-12 Extremism and the Psychology of Uncertainty showcases cutting-edge scientific research on the extent to which uncertainty may lead to extremist. Contributions come from leading international scholars who focus on a wide variety of forms, facets and manifestations of extremist behavior. Systematically integrates and explores the growing diversity of social psychological perspectives on the uncertainty extremism relationship Showcases contemporary cutting edge scientific research from leading international scholars Offers a broad perspective on extremism and focuses on a wide variety of different forms, facets and manifestations Accessible to social and behavioral scientists, policy makers and those with a genuine interest in understanding the psychology of extremism

The Handbook of Political Behavior-Samuel Long 2012-12-06 In the writing of prefaces for works of this sort, most editors report being faced with similar challenges and have much in common in relating how these challenges are met. They acknowledge that their paramount objective is to provide more than an overview of topics but rather to offer selective critical reviews that will serve to advance theory and research in the particular area reviewed. The question of the appropriate audience to be addressed is usually answered by directing material to a potential audience of social scientists, graduate students, and, occasionally, advanced undergraduate students. Editors who are confronted with the problem of structuring their material often explore various means by which their social science discipline might be subdivided, then generally conclude that no particular classification strategy is superior. In elaborating on the process by which the enterprise was initiated, editors usually resort to a panel of luminaries, who provide independent support for the idea and then offer both suggestions for topics and the authors who will write them. Editors usually concede that chapter topics and content do not reflect their original conception but are a compromise between their wishes and the authors' expertise and capabilities. Editors report that inevitable delays occur, authors drop out of projects and are replaced, and new topics are introduced. Finally, editors frequently confess that the final product is incomplete, with gaps occurring because of failed commitments by authors or because authors could not be secured to write certain chapters.

Adolescents and War-Brian K Barber 2008-09-04 Hundreds of thousands of children are forced or legally recruited combatants in no fewer than 70 warring parties across the world. In addition to these child soldiers, thousands of youth voluntarily participate in politically related conflict. Why, how, and in what capacities are such large numbers of teenagers involved in war and how are they affected? Adolescents and War brings together world experts in an evidence-based volume to thoroughly understand and document the intricacies of why youth have had substantial involvement in political violence. Contributors argue that the assumption that youth are automatically debilitated by the violence they experience is much too simplistic: effective care for youth must include an awareness of their motives and beliefs, the roles they played in the conflict, their relationships with others, and the opportunities available to them after their experiences with war. The book suggests that the meaning youth make of a conflict may protect them from mental harm. For example, Palestinian teen who were actively engaged in the first Intifada have fared better than Bosnian teens who were virtual sitting ducks to the sniper and grenade launches of the hidden forces during the siege of Sarajevo. Covering youth involvement in conflicts in Afghanistan, Angola, Ethiopia, Mozambique, Northern Ireland, Israel/Palestine, and Bosnia, the volume will be of interest to psychologists, sociologists, and political scientists and should be adopted for courses in social psychology, crisis intervention, and international conflict.

Coming of Political Age-Rebecca R. Callahan 2013-03-07 As one of the fastest-growing segments of the American population, the children of immigrants are poised to reshape the country's political future. The rallies for immigration rights in 2006 and the recent push for the DREAM Act, both heavily supported by immigrant youth, signal the growing political potential of this crucial group. While many studies have explored the rallies participation of immigrant adults, we know comparatively little about what influences civic participation among the children of immigrants. Coming of Political Age persuasively argues that schools play a central role in integrating immigrant youth into the political system. The volume shows that the choices we make now in our educational system will have major consequences for the country's civic health as the children of immigrants grow and mature as citizens. Coming of Political Age draws from an impressive range of data, including two large surveys of adolescents in high schools and interviews with teachers and
comparative perspectives. This volume also investigates whether gender equality in education is really being achieved in schools around the world or not. The Palgrave Handbook of Global Political Psychology-H. Dekker 2016-04-30 This collection recalibrates the study of political psychology through detailed and much needed analysis of the discipline's most important and hotly contested issues. It advances our understanding of the psychological mechanisms that drive political phenomena while showcasing a range of approaches in the study of these phenomena. Political (dis)engagement-Nathan Manning 2017-01-18 Academics from a range of disciplines join with political activists to explore the meaning of politics and citizenship in contemporary society and the current forms of political (dis)engagement, providing a timely interdisciplinary dialogue and interrogation of contemporary political practices. The Oxford Handbook of American Elections and Political Behavior-Jan E. Leighley 2012-02-16 The Oxford Handbook of American Elections and Political Behavior offers comprehensive coverage of the various theoretical approaches to the study of American elections and political behavior. The chapters are thoughtful and creative, providing broad overviews of intellectual developments and challenges, as well as incisive commentary on the accomplishments of, and challenges facing, scholars of American politics. Substantively, the Handbook includes chapters focusing on various approaches and issues in research design, political participation, vote choice, presidential and non-presidential elections, and issues, interests and elites as influences on individuals' political behaviour. Each of the chapters offers a working research bibliography, as well as retrospective evaluations of research and discussions of fruitful paths for future research. The Oxford Handbooks of American Politics are a set of reference books offering authoritative and engaging critical overviews of the state of scholarship on American politics. Each volume focuses on a particular aspect of the field. The project is under the General Editorship of George C. Edwards III, and distinguished specialists in their respective fields edit each volume. The Handbooks aim not just to report on the discipline, but also to shape it as scholars critically assess the scholarship on a topic and propose directions in which it needs to move. The series is an indispensable reference for anyone working in American politics. General Editor for The Oxford Handbooks of American Politics: George C. Edwards III Community Identity and Political Behavior-M. Anderson 2010-07-19 The focus of this book is on how community comes to influence political behaviour; it takes an interdisciplinary approach blending the fields of community psychology, sociology, and political science. The Red Guard Generation and Political Communication in China-Guobin Yang 2016-05-17 Raised to be "flowers of the nation," the first generation born after the founding of the People's Republic of China was united in its political outlook and at first embraced the Cultural Revolution of 1966, but then split into warring factions. Investigating the causes of this fracture, Guobin Yang argues that Chinese youth engaged in an imaginary revolution from 1966 to 1968, enacting a political mythology that encouraged violence as a way to prove one's revolutionary credentials. This same competitive dynamic would later turn the Red Guard against the communist government. Throughout the 1970s, the majority of Red Guard youth were sent to work in rural villages, where they developed an appreciation for the values of ordinary life. From this experience, an underground cultural movement was born. Rejecting idolatry, these relocated revolutionaries developed a new form of resistance that signaled a new era of enlightenment, culminating in the Democracy Wall movement of the late 1970s and the Tiananmen protest of 1989. Yang's final chapter on the politics of history and memory argues that contemporary memories of the Cultural Revolution are factionalized along these lines of political division, formed fifty years before. The Effects of Mass Communication on Political Behavior-Sidney Kraus 1976 The work is based on a two-year analytic review of the literature followed by a one-year synthesis of the findings. The one-year synthesis of the findings, in the words of a pre-publication reviewer, "is an attempt to redirect research in this whole area by examining the demonstrated utility of various approaches, urging that we discard some and adopt others as promising." The Effects of Mass Communication on Political Behavior will be indispensable for all students of communication, political behavior, speech, journalism, political sociology, and social psychology. Gender and Conversational Interaction-Deborah Tannen 1993-09-23 The author of the best-selling You Just Don't Understand, Deborah Tannen, has collected twelve papers about gender-related patterns in conversational interaction. The theoretical thrust of the collection, like that of Tannen's own work, is anthropological and sociolinguistic: female and male styles are approached as different "cultural" practice. Beginning with Tannen's own essay arguing for the relativity of discourse strategies, the volume challenges facile generalizations about gender-based styles and explores the complex relationship between gender and language use. The chapters, some previously unpublished and some classics in the field, address discourse across the lifespan, including preschool, junior high school, and adult interaction. They explore such varied discourse contexts as preschool disputes, romantic and sexual teasing among adolescent girls, cooperative competition in adolescent "girl talk," conversational storytelling, a faculty committee meeting, children in an urban black neighborhood at play, and a legal dispute in a Tenejapan village in Mexico. Two chapters review and evaluate the literature on key areas of gender-related linguistic phenomena: interruption and amount of talk. Gender and Conversational Interaction will interest general readers as well as students and scholars in a variety of disciplines including linguistics, sociolinguistics, anthropology, sociology, psychology, women's studies, and communications. Memory, Fluid Identity, and the Politics of Remembering-Li Li Peters 2016-06-09 Political Science: Political behavior-William Crotty 1991 In this volume, the study of legislatures has traditionally been a central preoccupation of political scientists. Legislatures provide good laboratories for testing theories and methodologies of significance in the discipline and, more broadly, for contributing to an understanding of how representative government works. Political Behavior Of Adolescents In China The Cultural Revolution In Kwangchow Yeah, reviewing a ebook political behavior of adolescents in china the cultural revolution in kwangchow could increase your near contacts listings. This is just one of the solutions for you to be successful. As understood, execution does not suggest that you have extraordinary points. Comprehending as well as concurrence even more than extra will have the funds for each success. bordering to, the revelation as well as keenness of this political behavior of adolescents in china the cultural revolution in kwangchow can be taken as without difficulty as picked to act.
